ABOUT ME

A web developer skilled in building responsive, user-centered web interfaces using HTML/CSS/JS, and libraries such as React, and Tailwind. Thrives in a collaborative environment, turning UI/UX designs into fully-functional interfaces while keeping an eye for detail, and user experience. Continues to seek opportunities to further grow and eventually become a full-stack developer while contributing clean, efficient, and maintainable code.

EXPERIENCE

May - Oct 2025

Halo Halo Corp.

Software Developer Intern

- Contributed bringing the UI/UX prototypes for Halo Halo Corp's main website and other web projects to interfaces by using React, and Tailwind libraries.

Jan - Mar 2025

"The Eunoia Project" Thesis

Full-Stack Web Developer

- Developed the entire UI/UX and functionalities using React, and Bootstrap.
- Handled connectivity between the frontend and backend, as well as its interactions with the database using Springboot.

Nov 2024

"Wheelz" Finals

Full-Stack Web Developer

- Partially developed the UI/UX of the website, and contributed connecting the frontend and backend, and making sure functionalities and server communications are operational.
- Made using React, Tailwind, and Springboot.

Mar 2024

"Kita-Kita" Capstone

Frontend Web Developer

- Solely developed a website's UI/UX for an activation campaign that promotes quality time between parents and their children in the digital age, as per request of a Capstone team.
- Made using HTML,CSS, and Javascript and had it successfully deployed on a rented domain.
